

# SFB 807 LECTURE

Research Training Group TRAM

## **Diversity and Inclusion: *An Essential Mix for Excellence in Higher Education and Research***

**Prof. Dr. Renae Ryan – University of Sydney**

Professor of Biochemical Pharmacology

Academic Director of the Science in Australia Gender Equity (SAGE) program

I will talk about the difference between Diversity and Inclusion and the importance of both to drive excellence in higher education and research. Then I will discuss some of the practical things we have implemented at the University of Sydney including a gender equity accreditation program that I lead - Science in Australia Gender Equity (SAGE). SAGE is based on the Athena SWAN program in the UK and similar programs are now running in the USA and Canada. The main aim of these programs is to increase the participation and retention of women and other minorities in STEMM.

**Thursday, February 13<sup>th</sup> 2020**

**11:15 a.m.**

**Biocenter Riedberg, N100/0.15**

**Everyone is invited!**

Pizza will be available after the talk
